Professional Summary

PHP Full Stack Developer with 5+ years of experience building scalable, high-performance web applications using Laravel, PHP, React, and Node.js. Experienced in designing RESTful APIs, optimizing complex database queries, integrating third-party services, and delivering production-ready e-commerce solutions. Strong background in software architecture, performance optimization, Docker, AWS, CI/CD, and clean, maintainable code following SOLID principles and design patterns. Passionate about building scalable systems and continuously improving development workflows through modern engineering practices and AI-assisted development.

Technical Skills

Programming Languages & Frameworks

- **Backend:** PHP 8+, Laravel (Advanced), Node.js (Intermediate), RESTful API Development
- **Frontend:** React.js (Advanced), Vue.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap
- **Database:** MySQL, PostgreSQL, MongoDB, Redis

Software Engineering

- Object-Oriented Programming (OOP)
- SOLID Principles
- Design Patterns (Repository, Factory, Strategy)
- RESTful API Design & Development
- Database Design & Query Optimization
- Performance Optimization & Caching
- Authentication & Authorization (JWT, OAuth2)
- API Integration & Documentation (Swagger/OpenAPI)
- Secure Coding Practices (OWASP)

Cloud, DevOps & Tools

- AWS (EC2, RDS, S3)
- Docker
- CI/CD Pipelines
- Git, GitHub, GitLab
- Linux
- Composer
- Postman
- Pusher (Real-time Features)

Architecture & Integrations

- Scalable Web Application Development
- Microservices Architecture
- Third-Party API Integration
- Payment Gateway Integration (Stripe, PayPal)
- E-commerce Platform Development
- Event-Driven & Real-time Systems

Development Practices

- Agile/Scrum Methodologies
- Code Review & Refactoring
- Technical Documentation
- AI-assisted Development (ChatGPT, GitHub Copilot , Claude)

Professional Experience

FULL STACK DEVELOPER | Kabseh Jo

July 2024 - Present

- Architect and develop scalable e-commerce solutions using Laravel, React, and MySQL, focusing on performance, maintainability, and reliability.
- Design, develop, and maintain secure RESTful APIs for web and mobile applications, integrating payment gateways, logistics providers, and third-party services.
- Optimize database performance through query tuning, indexing, caching, and schema improvements, significantly reducing response times.
- Implement scalable backend architectures and reusable components following SOLID principles and object-oriented design patterns.
- Develop real-time features, including notifications and messaging, using Pusher to improve user engagement and system responsiveness.
- Collaborate with cross-functional teams in an Agile environment, participating in architecture discussions, code reviews, and technical planning.
- Deploy and maintain applications on AWS using Docker and CI/CD pipelines, ensuring reliable and efficient production releases.
- Troubleshoot complex production issues, improve system stability, and continuously enhance application performance and code quality.

FULL STACK DEVELOPER | Glyphs Marketing

January 2023 - April 2024

- Built and deployed high-performance Laravel applications serving 100+ concurrent users with zero downtime
- Engineered RESTful API architecture that reduced data transfer time by 35% and improved mobile app performance
- Developed responsive, intuitive user interfaces using modern JavaScript frameworks, increasing conversion rates by 20%
- Integrated payment gateways (Stripe, PayPal) and cloud storage solutions for seamless customer experiences
- Implemented automated testing procedures that reduced post-deployment bugs by 45%
- Optimized database performance through indexing, query tuning, and caching strategies, reducing load times by 30%

BACKEND DEVELOPER | Digi Sol FZE

January 2022 - December 2022

- Designed and developed robust RESTful APIs that improved system response time
- Optimized database operations through strategic indexing and query optimization, reducing execution time by 15%
- Successfully integrated SMSA Express and other third-party APIs, enhancing system capabilities
- Implemented secure authentication and authorization systems using JWT and OAuth2
- Collaborated with front-end teams to ensure seamless data flow and consistent user experience
- Documented API endpoints and technical specifications for internal and external stakeholders

Key Projects

E-commerce Platform Revamp (Kabseh Jo)

- Led backend development for comprehensive platform modernization
- Implemented microservices architecture for improved scalability
- Technologies: Laravel, React, MySQL, AWS, Docker
- Result: 35% increase in platform performance and 25% growth in user transactions

Real-time Analytics Dashboard (Glyphs Marketing)

- Designed and built interactive analytics dashboard with real-time data visualization
- Implemented data aggregation and processing systems for marketing insights
- Technologies: Laravel, Vue.js, Socket.io, PostgreSQL
- Result: Reduced reporting time by 60% and increased client retention by 15%

Education

BACHELOR'S DEGREE IN COMPUTER SCIENCE

AL-ZAYTOONAH UNIVERSITY

October 2016 - January 2021

Professional Development

- **Laravel 8 - Build Advanced E-commerce Project A-Z**, Udemy (April 2023 - June 2023)
- **Laravel 8 - Advanced Course: Build School Management System**, Udemy (March 2021 - April 2021)
- **The Java Learning Guide**, Udemy (January 2021 - February 2021)
- **JavaScript, Bootstrap, & PHP - Certification for Beginners**, Udemy (November 2020 - December 2020)
- **The PHP 8 Learning Guide [2022 Edition]**, Udemy (November 2020 - December 2020)

Professional Strengths

- Advanced problem-solving and debugging skills
- Technical leadership and project coordination
- Excellent communication with technical and non-technical stakeholders
- Agile methodology implementation
- Continuous integration and deployment expertise
